Sammy The Sea Serpent

This is a combination game and story read to the child by the computer. As the story is told, the child is required to move Sammy from one adventure to another using the joystick. This program combines graphics, voice and sound effects into a unique product that will fascinate children and adults alike.

Side B has a program containing 2 games for the child to play with the Sammy character.

This course is recorded on a PDI Digi-Load cassette. The Digi-Load system uses digital recording techniques and chrome tape to make the finest possible computer tape.

PDI will replace any defective cassette free of charge upon receipt of defective tape.
